

Daniel Garcia

SALESFORCE DEVELOPER

PERSONAL PROFILE

Salesforce Developer with 4+ years of experience delivering Sales Cloud solutions using Apex, Flows, integrations, platform configuration and Agentforce. Experienced in building AI-powered solutions that automate processes and improve user productivity. I contribute to solution design, technical decisions, code reviews and knowledge sharing.

WORK EXPERIENCE

Salesforce Developer

Accenture | Mar 2023 – Present

- Develop Salesforce Sales Cloud solutions using Apex, Flows, integrations, platform configuration, and Agentforce.
- Build AI-powered Agentforce experiences that enable users to access information and execute tasks through conversational interactions.
- Develop AI-generated summaries and insights by consolidating data from multiple sources into Prompt Templates, supporting faster decision-making and improving user productivity.
- Implement automated business processes using Salesforce platform capabilities to reduce manual effort and improve process efficiency.
- Contribute to technical solution planning and implementation, making technical decisions for Salesforce solutions.
- Participate in code reviews and knowledge sharing, helping maintain development quality and consistency across the teams.

Salesforce Developer

Globant | Mar 2022 – Feb 2023

- Developed Sales Cloud solutions using Apex, LWC, Flows, platform configuration, and REST integrations.
- Improved sales processes by automating workflows, reducing manual effort, and enhancing user experience.

EDUCATION

Universidad Tecnológica Nacional

Systems Engineering | 2016 – 2020
